Kiratham, your perfect partner to deliver on your brand promise

Kiratham Educational Consultants Pvt Ltd is a leading player in the education sector, supporting the education system to deliver value to its stakeholders – schools, parents, students and the community. With a wide range of specially designed, unique products for schools and students, **Kiratham** is helping to deliver solutions that make schools meet their promise and put students on the path of good career choices.

Founded by IT and Education professionals with extensive National and International experiences in various markets, the company is driven by the knowledge, ethos and capacity of the founders garnered over several decades.

Headquartered in Bangalore, India, **Kiratham** is well positioned to deliver on its promise, which is to keep availing schools, students and parents, cutting edge, cost-effective solutions that ensure they succeed in meeting their objectives. From equipping schools with Physics labs to making the study of Mathematics fun and engaging with the use of manipulatives, as well as delivering premium, distinct school uniforms to training teachers with the latest classroom management techniques, Kiratham solutions for schools are well thought out and designed to deliver benefits across the entire value chain.

In addition, **Kiratham** offers counselling and career guidance services, as well as university placement services, to students. This twin service ensures students receive support to enable them to determine their strength and interest, thus guiding them to appropriate career choices. Beyond this is also availing student placement in leading universities or universities of their choice. **Kiratham's** many years of student placement services come to bear, particularly in helping students through the rigours of filling of applications, interview skills, visa processing, arrangement for accommodation for students travelling abroad, among many other tasks that often prove daunting and quite tasking.

With **Kiratham**, you have a partner that seeks your best interest, who sees its growth in your growth, its success in your success, and delivering on your brand promise to your clients and stakeholders every single time, as its ultimate win.

PRODUCTS

Equipping schools' Physics labs with modern equipment

Schools across the world, not just in India, have the critical challenge of sourcing modern equipment for their Physics laboratories in a cost-efficient manner. With the proliferation of sub-standard equipment and the pricey nature of original laboratory equipment, **Kiratham**, takes on the role of being a lab equipment distributor for various organizations that provide secondary and higher secondary schools, colleges and Universities, with Physics apparatus and equipment.

Our partnered organizations have over 74 year-rich record of providing *Physics equipment* for schools, Colleges and Universities for their all classes including B. Sc., M. Sc. and Engineering programmes. With over 300 items in its stable – some of which it manufactures and others sourced from suppliers, these equipment have proven to be durable and impactful in students' study and understanding of Physics. Some of the equipment includes Potentiometer, Kundt's Tube apparatus, Surface Tension apparatus (Capillary Rise Method), Liquid Lens apparatus, among many others, numbering over 300.

The partnership between **Kiratham** and the other organizations will enable schools and colleges anywhere in India to quickly stock up their Physics laboratory without overshooting their budget. The partnership also avails schools and colleges after-sales support to ensure that the equipment serves generation of students.

PRODUCTS

Arming schools with manipulatives to make Mathematics enjoyable

Research has shown that many schools have struggled, and still continue to struggle, to make the study of Mathematics interesting and engaging. Without the interest, students cannot be engaged. With Mathematics continuing to play an increasingly important role in students' progress and career choices, building a foundation for this subject early in the life of a student is imperative.

It is easy to lose interest in Mathematics. How do you move from the abstract to the concrete when teaching patterns, measurement, geometry, statistics and probability, which are fundamental to Mathematics? That is where the use of manipulatives come in!

Manipulatives are powerful tools for supporting teaching of Mathematics, which help to move the abstract topics to concrete shapes that students can easily relate to. In addition, math manipulatives build students' confidence by giving them a way to test and confirm their reasoning, and also make learning Mathematics interesting and enjoyable for primary and junior secondary schools.

Kiratham has a wide and varied range of Mathematical Teaching and Learning Manipulatives that enable every teacher to impart and inculcate interest in Mathematics in their students. These make a very visual and interactive tool for students to easily learn Mathematics.

With the support of **Kiratham**, you can transform the fear for Mathematics among your students to a phase where they will enjoy their time in the classroom, thus, boosting their confidence. This will certainly lift performance in Mathematics and help students prepare for better career choices.

PRODUCTS

Premium uniforms that showcase heritage

Among the first benefits of sourcing uniforms from bulk suppliers like **Kiratham** is that schools are availed the advantages of mass production: cost saving, uniformity in design and style, as well as colour, including availability of uniforms all year round. With the burden of parents sourcing for uniforms or schools sourcing uniforms for individual students taken up by **Kiratham**, schools are then left to focus on their core competencies.

Kiratham ensures uniforms of the highest possible standard, in terms of fabric and style, are delivered to schools. They are premium quality school and college uniforms, which are easy to wash, iron and wear. They are specially designed apparel that meets comfort needs and boosts the corporate image of schools and other institutions.

Kiratham brings its unique professionalism to bear in helping schools and institutions determine their uniform needs, bearing in mind the peculiar need of each school's identity. Uniforms, if well designed and delivered, help to convey a school's unique character and heritage.

At **Kiratham**, we specialise in delivering this experience.

PRODUCTS

MyClean, the innovative sanitary napkin disposal machine

The question has always been: How do you dispose used sanitary napkins without causing nuisance to the environment or blocking pipes in a girls' dormitory, or large office? Which is the best route to proper Menstrual Hygiene Management (MHM) that will remove the stigma associated with menstruation, guaranteeing the health, dignity, self-esteem and privacy of millions of adolescent girls and women?

This is where **MyClean**, an innovative, trendy, easy-to-install and use napkin incinerator is especially useful. **MyClean** burns a used napkin at very high temperature and leaves only 1gm of ash at the end of the process. These machines can be installed inside the toilet or the common area in a girls' dormitory.

MyClean not only saves schools and institutions the cost of constant repairs of blocked pipes as a result of clogging by disposed sanitary napkins, it also helps schools contribute their quota in saving the environment from piles of used sanitary napkins.

SERVICES

A planetarium inside the School campus.

Kiratham brings interesting faraway mysteries of outer space for the child in school's secured environment. Star, constellations, satellites and other breathtaking dimensions of space are brought alive before their eyes through advanced 3D projection and state of art audio-visual equipment. This unique experience is now brought to your own school at an affordable fee, so that the children can enjoy and benefit from this educational event.

The Planetarium show is the most advanced immersive classroom, a place where people can come to learn just about anything and feel as though they are there. The phrase "The sky is the limit" just got a whole new meaning when it comes to the immersive classroom.

While astronomy has recently re-emerged in many science curriculums, there remains unresolved teaching and learning difficulties peculiar to astronomy education. We urge that 'mental model building' should be reflected in astronomy education. Planetariums play a critical role in this aspect.

SERVICES

Unique train-the-teacher programmes for the modern school

Teachers are one of the most important elements in the school ecosystem. Skills and quality of the teaching staff are directly related to a student's performance. At Kiratham, we believe teachers require regular training to arm themselves with modern teaching methods, classroom management, child psychology and specific management methods to make them the best teachers possible.

Because education is a constantly evolving sector, it is imperative to invest in teachers so as to ensure that pedagogy is constantly aligned with the latest developments across many fields that have an impact on the education sector. **Kiratham's train-the-teacher programmes** come in several modules, modelled to meet the specific needs of each school.

Although educational platforms such as Learning Management Systems and Learning Content Management systems are critical to providing effective education solutions, however, without a cadre of teachers that are on top of their game, all that resource will be sub-optimised. A well trained teacher can utilise these resources to make learning fun and engaging, directly making an impact in the ability of schools to be competitive.
